Appetizers

Take a picture then: #9
`chafa <image> &&`
`jp2a <image>`

DIY ASCII/terminal art

`presenterm slides.md` #10

Terminal-brewed slide decks [served cold]

`cat <file> &&` #11
`bat <file>`

A feline and a rodent cook your file - check out which has the better assortment

`genact` #12

A dish for the pretentious and the oblivious

#13

`df && duf`

One of them has better table manners...

#14

`glmark2 --`
`annotate -b`
`":duration=3.0"`

Hallucinatory drug for your GPU

#15

`glmark2 --run-`
`forever -b`
`refract`

Eye candy which your GPU will also enjoy eating

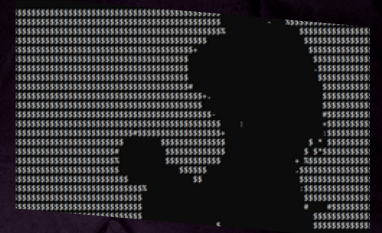

Main Course

(requires assistance - ask someone to do these for you!)

#1

bad apple

Don't worry, it's still edible

#2

tp1ay

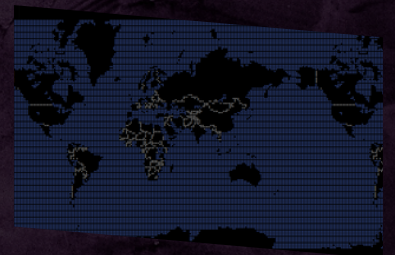

A Motion Picture Presentation

#3

mapscii

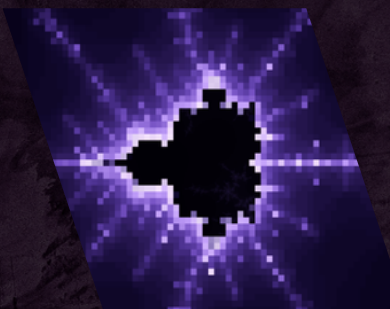

The world is yours (your terminal's, to be precise)

#4

fractol

A camera without a zoom limit!
(Kubrick would have loved this)

#4

doom-cli

I mean if a pregnancy test display
can run Doom, then surely-

DESSERT

(challenge yourself)

Exiting a text editor
sounds easy, right?
Well, VIM doesn't
think so.

EXIT VIM

Set upstream repo and
get your first commit
to go live.

FIRST PUSH

Flatpak is hungry for
some new software. (Are
the food metaphors
getting old yet)

SOFTWARE SOURCES

Today's Special Menu

Chef's Favorites

- **Yazi or Ranger** **\$12**

Tired of `cd` and `ls`? We have just the dish for you!

- **tig** **\$11**
Git¹

- **LKMS** **\$5**
Just the kernels, no popcorn, in a shell.

- **github-cli** **\$7**

For the Nerds

- **lazygit** **\$10**

Smooth Github UI blended with chilled commands and a touch of ASCII.

- **lazyvim** **\$10**

***EXIT VIM** challenge stares longingly*

- **IRC** **\$67**

Yeah, it's somehow still on the menu after all these years
